Computer Science undergraduate (GPA 3.91/4.00) specializing in AI Engineering - built production-grade LangGraph agents with RAG and vector search, Text-to-SQL analytics, and AI-powered mobile/web products serving 1,000+ users. Delivered via React Native, Django, and PyTorch, with enterprise data pipelines optimized at Kalbe International (-50% dashboard load). Passionate about shipping reliable, user-centered AI products.

Skills

- **LLM & Agent Tooling:** LLM APIs, Prompt Engineering, Vector Stores, RAG Pipelines, Text-to-SQL
- **Programming languages:** Python, JavaScript, TypeScript, SQL
- **Framework & Libraries:** React, React Native, PyTorch, LangChain, LangGraph, Django
- **Databases & Tools:** MongoDB (Vector DB), PostgreSQL, MySQL, REST APIs, Git

Work Experiences

Full Stack Developer – Intern

Kalbe International | Jakarta Timur, Dec 2025 – May 2026

- Maintained and debugged internal sales dashboards and Master Data Management systems, resolving missing and inconsistent data to restore reporting accuracy for the Sales Department
- Optimized MySQL queries via batching, reducing dashboard load time by **50% (from ~3 min to ~1.5 min)** and improving application responsiveness
- Integrated NetSuite SOAP APIs to extract subcompany sales data for consolidation into main database - unlocked previously siloed datasets
- Maintained Python automation for Excel-to-database ingestion from emails - improved reliability and error handling
- Assisted in cleansing and validating **1,000+** Master Data records via systematic QA - ensured reporting consistency

Mobile Application Developer & AI Engineer – Intern

President University | Bekasi, Aug 2025 – Dec 2025

- Maintained and enhanced a React-based AI chatbot serving 1,000+ students for academic queries, improving response relevance and reliability
- Built a cross-platform React Native app (iOS/Android) unifying student profiles, GPA, schedules, and AI-powered support tools
- Deployed goal-driven AI agent (LangGraph + MongoDB) simulating design-thinking workshops for personalized learning at scale
- Implemented memory retrieval and prompt-chaining for multi-turn reasoning, enhancing agent adaptability and contextual accuracy

Programming Concept Lab Assistant – Part-Time

President University | Bekasi, Sep 2025 – Dec 2025

- Mentored 40+ first-year students in programming fundamentals: loops, conditionals, pointers, and data structures through hands-on labs and debugging sessions
- Graded assignments and exams for 3 cohorts with detailed feedback, contributing to improved pass rates
- Created supplemental exercises and troubleshooting guides to reinforce core concepts and reduce repeat errors

Projects

PUIS Mobile – App Developer, AI Orchestration

Tech: React Native | LangGraph | MongoDB Vector Store | RAG

- Delivered unified mobile app centralizing GPA, payment history, schedules, and academic records - adopted as the primary student portal (1,000+ active users)
- Integrated RAG + vector-search AI services delivering personalized academic recommendations (powers 1,000+ student chatbot)
- Launched AI-driven design-thinking simulation module (LangGraph + MongoDB) for interactive, scenario-based learning at scale

Defect Detection & Root Cause Analysis – AI Trainer

Tech: YOLO | Mask R-CNN | PyTorch | Polygon Annotation | OpenCV

- Curated and polygon-annotated a custom dataset of toy-car defects, for instance segmentation
- Benchmarked YOLO vs. Mask R-CNN for toy-car defect detection - Mask R-CNN **doubled precision (45% vs 23% YOLO)**
- Built ML classifiers to correlate visual defect patterns with root causes, enabling automated QA feedback loops

Smartchurch Chatbot – AI Orchestrator, Web Developer

Tech: LangGraph | Django REST | React | PostgreSQL | Text-to-SQL | Seaborn

- Architected LangGraph agentic chatbot translating natural language to PostgreSQL and auto-generating Seaborn visualizations
- Built secure Django REST + React platform enabling non-technical staff to query church data in natural language
- Implemented a guarded Text-to-SQL pipeline with schema validation and automated chart generation, enabling self-service reporting from natural language

Education

President University – Bekasi, Indonesia

Bachelor of Computer Science, 2023 – 2026

GPA: 3.91 / 4.00 (Magna Cum Laude)

Scholarship: Jababeka Partial Scholarship (75%, 2nd Rank)

- 2nd Place – App Category, President University Economic Survival Exhibition
- Member, Learning Division – PRESCOME (President University Computer and Technology Enthusiast)
