I am a responsible and hardworking student at President University with a strong interest in Artificial Intelligence and its real-world applications, along with Web Development. My native language is Indonesian, and I am proficient in English.

Skills

- | | | |
|--------------|-----------------------|----------|
| • Python | • React | • React |
| • Javascript | • React Native | • OpenCV |
| • Pytorch | • Langgraph/Langchain | |

Projects

Defect detection and root cause analysis - AI Trainer

- Created a custom dataset of toy car defects and annotated images using polygonal segmentation
- Trained object detection and image segmentation models (YOLO, Mask R-CNN) for defect identification,
- Developed machine learning models for root cause analysis of detected defects

COVID-19 Question Answering Chatbot - AI Trainer

- Built a semantic search system using deep learning to retrieve relevant answers from COVID-19 research
- Used vector embeddings and similarity search to match questions with the most relevant contexts
- Fine-tuned and compared transformer models to improve biomedical question answering performance

Nutrical - Prompt Engineer, App Developer

- Designed effective prompts for a large language model (Gemini) to extract nutritional information from user-uploaded food images
- Structured the LLM outputs into consistent, usable formats for further processing
- Developed a system to log and display users' daily nutrient intake based on model predictions

Education

President University, Bekasi, 2023 – Present

Bachelor of Computer Science | GPA: 3.94/4.00

- Achieved second place in application category in President University Economic Survival Exhibition
- Part of Learning Division of President University Computer and Technology Enthusiast (PRESCOME)

Work Experiences

Mobile Application Developer and AI Engineer – Internship

President University | Bekasi, Aug 2025 – Present

- Developed and maintained a React chatbot for university use, enhancing stability and user experience.
- Built a React Native student app with academic/profile viewing and integrated AI chatbot features.
- Implemented an AI agent using LangGraph for design thinking simulations.
